Challenge #7: Block, Inline, Class, and Id

Objectives:

1. Apply Block, Inline, Class, and Id in your project.

BLOCK, INLINE, CLASS, ID

```
87     .place img {
88         width: 100%;
89         height: auto;
90     }
91 </style>
92 </head>
93 <body>
94     <div id="navban">
95         <button class="nav-button" onclick="location.href='index.html'">Home</button>
96         <button class="nav-button" onclick="location.href='about.html'">About Us</button>
97         <button class="nav-button" onclick="location.href='contact.html'">Contact Us</button>
98         <button class="nav-button" onclick="location.href='book.html'">Book Now</button>
99     </div>
100
101     <div class="bgimg">
102         <h1>Welcome to the Philippines</h1>
103         <p>A journey of a thousand miles begins with a single step.</p>
104     </div>
105
106     <div id="places"></div>
107
108     <script>
109         const places = [
110             {
111                 name: "Boracay",
112                 description: "Famous for its white-sand beaches and vibrant nightlife.",
113                 image: "D:/Files/Documents/abby website/yme html pics/tress.jpg",
114                 link: "boracay.html"
115             },
116             {
117                 name: "Palawan",
```
