

# Website Goals and Plan

## Goals:

1. Easy to Use: The website should be simple and user-friendly.
2. Works Everywhere: Make sure it looks good on phones, tablets, and computers.
3. Good Content: Add useful and clear information for the users.
4. Fast and Secure: The website should load quickly and keep user data safe.

## Plan:

### 1. Think Before Starting

- A: Decide what the website is about.
- B: List the pages you want (like Home, About, Contact).
- C: Sketch how it will look (draw it out Figma).

### 2. Design the Look

- A: Use basic HTML for the structure.
- B: Add colors, fonts, and styles using CSS.
- C: Test how it looks on different devices.

### 3. Add Features

- A: Write simple JavaScript for interactivity (like buttons or forms).
- B: Check that everything works.
- C: Fix any errors.

### 4. Launch It

- A: Save the website files.
- B: Upload them to a hosting site like GitHub.
- C: Share the website link.
