

DELGADO LAWRENCE B. 1 - BSINFOSYS

Challenge #1: Building a Restaurant and Blog Website

Goals and Plan for the Website

The main goal of this website is to create a simple, stylish, and user-friendly platform. It will include blogs about Foods, product categories, and features like managing orders. The website aims to attract users by providing easy navigation, useful content, and an enjoyable experience.

Objectives

1. **Engage Users:** Add features like menus, shopping options, and hover effects to make the website interesting.
2. **Responsive Design:** Make sure the website works well on phones, tablets, and computers.
3. **Easy Navigation:** Organize the layout so users can easily find what they're looking for.
4. **Interactive Tools:** Let users browse categories, manage carts, and clear order history without trouble.
5. **Modern Design:** Use appealing colors, animations, and styling to give the website a fresh look.

Plan

1. Design

- Plan the website's structure and appearance to focus on simplicity and usability.

2. Development

- Use clean code to build the layout with HTML, CSS, and JavaScript.
- Add menus and interactive elements like a shopping cart.

3. Content

- Include blogs about fashion trends and tips.
- Add videos, pictures, and other content to make the site more engaging.

4. Testing

- Check how the website works on different devices and browsers.
- Fix any issues to make it run smoothly.

5. Final Touches

- Improve the design and speed of the website.
- Make sure all features, like managing orders and browsing menus, work perfectly.

--

Outcome

This plan will help build a website that is simple to use, looks good, and offers useful tools for users. It will attract people interested in foods and create a great experience for everyone visiting the site.
