

CHALLENGE #1: GOAL

My Plan and its Goal

The Website's Goal:

- Create a library of literatures inspired from Wattpad and W3school.com with wide range of genres where the contents will be my literatures when I was in senior high school.
- As a library, it should serve its purpose as an online reading room.
- Apply knowledge gained from W3school and;
- Make sure it's responsive, structured well, simple, and formal.

The Plan:

- Structure the website using HTML, CSS, and JavaScript.
- The website will only use few colors, and fonts as its theme.
- It must look like the W3school where it is inspired. However, originality and uniqueness must be observed too.
- Add a search box, log in/sign-up functionalities, and a dark mode/light mode option.
- Apply knowledge gained from W3school.
