

Leonel D. Valdez.

Challenges #1

I am Leonel Valdez, 1 - BSInfoSys A in the College of Engineering in Information System. My goal in creating my own website is to be an aspiring programming someday and this is my stepping stone to achieve my goal.

My website is all about the Universe. I choose this content because when I was a child, I want to be a astronaut and explore the Universe. That's why I choose this content to dedicate it to my childhood dreams.
