Wariloh M. Bansawan 1 BS Info Sys - A

My anime website aims to provide high-quality content, such as in-depth reviews, top 10 lists, and seasonal guides, while fostering user engagement through forums, polls, and watch parties. Using HTML for structure, CSS for a visually appealing, mobile-friendly design, and JavaScript for interactivity, I will ensure the site is responsive and easy to navigate. I will prioritize SEO and accessibility to reach a wider audience, host the website on a reliable platform, and continuously update it with fresh content, all while directing users to legal streaming services for a safe viewing experience.
