Introduction

This document outlines the goals and plan for my website, based on my learning from W3Schools. The website aims to provide educational resources and interactive content for beginners in web development.

Goals

- **Educational Content**: Provide tutorials and articles on HTML, CSS, JavaScript, and other web technologies.
- **Interactive Learning**: Implement interactive coding exercises and quizzes.
- **Community Engagement**: Create a forum for users to ask questions and share knowledge.

Plan

1. **Research and Content Creation**: Develop comprehensive tutorials and articles.
2. **Website Design**: Design a user-friendly interface with a focus on accessibility.
3. **Development**: Code the website using HTML, CSS, and JavaScript.
4. **Testing**: Conduct thorough testing to ensure functionality and usability.
5. **Launch**: Deploy the website and promote it through social media and other channels.

Technologies Used

- **HTML**: For structuring the content.
- **CSS**: For styling the website.
- **JavaScript**: For adding interactivity.
- **Bootstrap**: For responsive design.
- **GitHub**: For version control and collaboration.

Timeline

1. **Week 1-2**: Research and content creation.
2. **Week 3-4**: Website design and initial development.
3. **Week 5-6**: Development and testing.
4. **Week 7**: Final testing and launch.

Conclusion

Based on my learning from W3Schools, my website goals are to create a user-friendly, responsive design with high-quality content, and optimized performance. I will ensure that it is accessibility for all users, and continuously improve through analytics and user feedback.
